

UERC HOLDS PUBLIC HEARING USING STAPES AUDIO CONFERENCE SYSTEM

UERC stands for the **Uttarakhand Electricity Regulatory Commission**. It is a regulatory body in the Indian state of Uttarakhand responsible for regulating the electricity sector, ensuring fair practices, and addressing the interests of both consumers and electricity providers. UERC has selected the STAPES Audio conference system for its head office in Dehradun. Specifically, they have opted for the STAPES conference system to facilitate hearings conducted by three judges. Initially, the commission acquired conference gooseneck microphones for use in their courtroom

CHALLENGE:

The Regulatory Community has recently undertaken an initiative to modernize its conferencing practices, replacing the outdated system. This includes incorporating video conferencing capabilities for collaborative purposes. The primary objective is to install 11 microphones in order to enhance the in-room systems for judges, ensuring exceptional sound and audio quality, along with user-friendly features

SOLUTION:

The issue was addressed by implementing a solution that involved installing 11 delegate stations to facilitate seamless communication among judges and enable effective interaction with other parties during hearings. To optimize the setup, the system rack was positioned at a distance from the seating, and strategic placement of ceiling speakers was carried out to ensure excellent audio quality and speech intelligibility with Digital CAT5 cables connections

RESULT:

The customer expresses great satisfaction with the communication setup, as everyone in the room now experiences clear and natural sound during interactions

"We conducted thorough research to identify an appropriate system for this distinctive installation designed for meetings and hearings involving top government officials. We are pleased with our decision to choose STAPES, as they provided timely support in procuring materials and assistance during the installation of the conferencing equipment. Thanks a ton!"
